

Claim Listing:

1-2. (Cancelled)

3. (Original) A method of determining a useful salt, from within a series of salts of a particular medicinal compound, for use in making a composition of matter comprising an inclusion complex of said salt in a cyclodextrin, said method comprising:

a. determining a quantity of said medicinal compound required for therapeutic efficacy;
b. choosing a maximum total dose in which to administer said quantity of medicinal compound;

c. calculating the minimum required solubility of a salt of said compound necessary to formulate said maximum total dose;

d. obtaining said series of salts;

e. determining the equilibrium solubility of each of said salts in said cyclodextrin; and

f. selecting, as said useful salt, a salt from said series having an equilibrium solubility in said cyclodextrin sufficient to permit making a total dose equal to or less than said maximum total dose.
